Re: Modeling Data for BHP Billiton Cabrillo Port Project

Dear Nahid:

In December 2005 BHP Billiton LNG International submitted a revised Minor New Source Review application for its proposed Cabrillo Port project. That application included an ambient impact modeling analysis utilizing five years of meteorological data. You recently requested that we provide you the processed meteorological data and the input and output files. Please find the requested information on the enclosed compact disc.

Let me know if you have any questions.

Sincerely,

Thomas R. Wood
